Protective Coating for Equipment Operating in Immersed Erosive Conditions

Belzona 5821 is a multi-purpose brush or spray applied coating that provides outstanding protection from the effects of salt, water, acids, alkalis, alcohols and hydrocarbons.

This material can be applied to virtually any rigid surface including cast iron, stainless steel, brass, copper, concrete, wood, fiberglass and aluminium.

Belzona 5821 provides protection against erosion by binding engineered and tightly packed ceramic particles to its epoxy-based resin system, creating a seamless encapsulating coating.
